President’s Message	iii
24 th Conference Committee and Citation of Papers	iv
Reviewers	v
Sponsors	vi
AAABG Rules	vii
AAABG Fellows	ix
AAABG Honorary Members	x
Helen Newton Turner Medal	xi
Helen Newton Turner Bright Futures Award	xii
Table of Contents	xiii
John Vercoe Memorial Lecture	
Breeding Australian cattle for production in the year 2050	1
<i>B. J. Hayes, K.E. Kemper and L. Prada E Silva</i>	
Plenary Papers	
Advancing livestock well-being – The role of genetic improvement	6
<i>S. Dominik</i>	
Measurement enabled precision interventions: A future opportunity for livestock farming	10
<i>M.R. Hutchinson</i>	
The future of genotyping	14
<i>J.C. McEwan, K.G. Dodds, T.P. Bilton, R. Brauning, S.J. Rowe, M.K. Hess, K.M. McRae, A.F. McCulloch, R.A. Anderson and S.M. Clarke</i>	
The contribution animal breeding can make to industry carbon neutrality goals	15
<i>S.J. Rowe, S.M. Hickey, P.L. Johnson, T.P. Bilton, A. Jonker, W. Bain, B. Veenvliet, G. Pile, B. Bryson, K. Knowler, N.C. Amyes, S.A. Newman and J.C. McEwan</i>	
What can research on the genetic of human well-being tell us about improving livestock well-being?	19
<i>P.M. Visscher and N.R. Wray</i>	
Contributed Papers	
Assessment of genomic predictions for feedlot and carcass traits in Australian Angus steers	22
<i>P.A. Alexandre, Y. Li, B.C. Hine, C.J. Duff, A.B. Ingham, L.R. Porto-Neto and A. Reverter</i>	
Genetic association between ultrasound and carcass muscle dimension measures in sheep	26
<i>P. Alexandri, S.F. Walkom and D.J. Brown</i>	
Merits of developing a genetic evaluation for the Australian dairy sheep and goat industries	30
<i>P. Alexandri, R.G. Banks, D.J. Brown and S.F. Walkom</i>	
Genetic progress for environmental outcomes – How do we get it?	34
<i>P.R. Amer</i>	

Trait prioritisation methods used in animals also work in plants	38
<i>I.A. Balogun, T.J. Byrne, B.F.S. Santos, P.R. Amer, P.F. Fennessy, D. Martin-Collado, B. Abolore, B. Okoye, B. Teeken, O.D. Olaosebikan, T. Madu, D. Owoade, A. Ogunade, M. Ejechi, N. Onyemauwa, S. Onwuka, B. Ukeje, P. Kulakow, C. Egesi, J. Onyeka, I. Rabbi, J. Jannink and H.A. Tufan</i>	
Impact of breeding for divergent methane yield on milk composition in breeding ewes	42
<i>T.P. Bilton, S.M. Hickey, P.H. Janssen, A. Jonker, M.K. Hess, B. Bryson, W. Bain, E. Waller, K.M. McRae, S. Muetzel, M. Agnew, J.C. McEwan and S.J. Rowe</i>	
Phenotypic trade-offs between lambs and wool reflect weak antagonistic genetic correlations between reproductive and wool traits	46
<i>K.L. Bunter and A.A. Swan</i>	
Using selected sequence variants to improve genomic prediction of heat tolerance in dairy cattle	50
<i>E.K. Cheruiyot, M. Haile-Mariam, B.G. Cocks, I.M. MacLeod and J.E. Pryce</i>	
Split paternity is high in twins born from syndicate mated Merino ewes	54
<i>B.E. Clarke, K.L. Egerton-Warburton, J.L. Smith, B. Paganoni, G.B. Martin and A.N. Thompson</i>	
Visual classing grades are heritable and visually classed Merino sheep born and reared as twins are graded lower than singles	58
<i>B.A. Metcalfe, J.C. Greeff, A.N. Thompson and B.E. Clarke</i>	
Responses to heat in ewes from indigenous and commercial South African sheep breeds: Preliminary results	62
<i>S.W.P. Cloete, D.A. van der Merwe, S. Steyn, A. Muller, J. Melgar, C.K. Cornwallis and T.S. Brand</i>	
Genetic parameters for reproduction in intensively and extensively managed Dohne Merino flocks in South Africa	66
<i>S.W.P. Cloete, C.L. Nel, J.J. Olivier and G.J. Delport</i>	
Addressing scur phenotypic challenges with the Southern Multi-Breed Project	70
<i>N.K. Connors, B.J. Walmsley and K.A. Donoghue</i>	
Assessing the relationship between beef cattle fertility traits and novel environmental descriptors in Northern Australia	74
<i>J.P. Copley, B.N. Engle, S. Speight, G. Fordyce, E.M. Ross, K.P. Voss-Fels and B.J. Hayes¹</i>	
Genotyping dairy cattle with skim whole-genome sequencing and imputation	78
<i>H.D. Daetwyler, J. Li, C.J. Vander Jagt, I.M. MacLeod, J. Pickrell, M. Vasquez, J.Hoff and A.J. Chamberlain</i>	
The impact of genotype by environment interaction on breeding vales for 150-day weight in Katahdin sheep in Mexico	82
<i>L. De La Cruz, S.F. Walkom and A.A. Swan</i>	
Genome-wide association analysis for temperament in Australian sheep	86
<i>S. de las Heras-Saldana, N. Moghaddar, S.A. Clark and J.H.J. van der Werf</i>	
A genomic comparison of Australian, New Zealand and Norwegian dairy goat populations	90
<i>K.G. Dodds, J.H. Jakobsen, M. Wheeler, T. Blichfeldt, R. Brauning, H.J. Baird and J.C. McEwan</i>	
The benefit of a slick hair coat for heat tolerance in New Zealand dairy cattle	94
<i>E.G. Donkersloot, G.M. Worth, A.F. Yeates, M.D. Littlejohn, L.R. McNaughton, R.J. Spelman and S.R. Davis</i>	

Southern Multi-breed resource population: Generation of cohorts one and two <i>K.A. Donoghue, B.J. Walmsley, J.P. Siddell, T. Granleese, L. Penrose and P.F. Arthur</i>	98
The value of live-animal ultrasound scanning of breeding candidates for carcass traits in the age of genomics <i>C.J. Duff, B.J. Crook, A.I. Byrne and M.J. Reynolds</i>	102
Reducing lameness and urinary nitrogen excretion through selection on next generation national dairy selection indices <i>J.E. Newton, M. Dunstan, P.N. Ho, M. Khansefid, I. van den Berg, S.S. Chauhan and J.E. Pryce</i>	106
Genomic predictions of lifetime productivity in Brahm cows <i>B.E. Engle, A. Collins Snr and B.J. Hayes</i>	110
The effects of number of reference individuals on the accuracy of imputation from low and medium densities to high density <i>M.H. Ferdosi, N.K. Connors and M. Khansefid</i>	114
Evaluation of haplotype diversity of Australian beef populations using medium-density SNP genotypes <i>M.H. Ferdosi, N.K. Connors and M. Khansefid</i>	118
Phenobank: A platform to facilitate collaboration and genomic selection for female fertility in beef cattle <i>K.B. Wockner, M.S. Tahir, J. Kour, W.L.A. Tan, B.S. Olasege, L.R. Porto-Neto, B.A. Little, C.R. Wilson, W. Dollemore, A. Reverter, B. Hayes and M.R.S. Fortes</i>	122
Genome wide analysis of bovine enhancers and promoters across developmental stages in liver <i>M. Forutan, C.J. Vander Jagt, E. Ross, A.J. Chamberlain, B. Mason, L. Nguyen, S. Moore, J.B. Garner, R. Xiang and B.J. Hayes</i>	126
Is sex determination in Merinos heritable? <i>T. Granleese, M.R. Mortimer and S.F. Walkom</i>	131
Multivariate analyses using two genomic relationship matrices to weight predictive SNP markers <i>P.M. Gurman, L. Li, A.A. Swan, N. Moghaddar and J.H.J. van der Werf</i>	135
Characterizing the quantity and quality of data used in Merino sheep genetic evaluation systems <i>S.Z.Y. Guy and D.J. Brown</i>	139
Maximising genetic gains with data quantity and quality in Merino flocks <i>S.Z.Y. Guy and D.J. Brown</i>	143
Genomic evaluation of male fertility of Australian Holstein-Friesian and Jersey bulls <i>M. Haile-Mariam, K. Konstantinov, E.G. Jewell, G.J. Nieuwhof and J.E. Pryce</i>	147
Quantifying genetic variation in urination traits of grazing dairy cattle <i>R.C. Handcock, L.A. Box, C.M. Thomas and D.J. Garrick</i>	151
Group records with genomic prediction convert accuracy into genetic gain more efficiently than pedigree prediction <i>M. Henryon, G. Su, A.C. Sørensen and T. Ostensen</i>	155
Economic values for farrowing rate to improve seasonal fertility <i>S. Hermes</i>	159
Across-country prediction of methane emissions using rumen microbial profiles <i>M.K. Hess, A. Donaldson, H.M. Henry, D.L. Robinson, A.S. Hess, J.C. McEwan, V.H. Oddy and S.J. Rowe</i>	163

Characterisation of spermatozoal transcriptomes in sheep and the influence of breed and semen quality	167
<i>M.J. Hodge, S. de-las Heras-Saldana, S.J. Rindfleish, C.P. Stephen, and S.D. Pant</i>	
The predicted responses to genomic selection in growing pigs	171
<i>M. Shariful-Islam, J.H.J. van der Werf, V. Boerner and S. Hermes</i>	
New Zealand national dairy breeding objective review stakeholder survey	175
<i>G.M. Jenkins, B.F.S. Santos, P.R. Amer, K. Stachowicz, A. Young and B. Wickham</i>	
Evaluation of Australian breeding values for heat tolerance under US conditions	179
<i>L.M. Jensen, E.A. Jannaman, J.E. Pryce, A. De Vries and P.J. Hansen</i>	
Investigation of the pathogenesis of suspected inherited neurological diseases in Australian sheep	183
<i>L.K. Manning, B.A. O'Rourke, M. Krockenberger, K.L.M. Eager and I. Tammen</i>	
A genome-wide association study (GWAS) for carcass traits in Hanwoo cattle using imputed whole genome sequence data	187
<i>H. Kim, S. de las Heras-Saldana, N. Moghaddar and J.H.J van der Werf</i>	
Management of inbreeding and coancestry to target short-term and long-term genetic gains	191
<i>B.P. Kinghorn and A.J. Kinghorn</i>	
Accuracy of genomic prediction in Brahman cattle using simulated genotypes from low-coverage nanopore sequencing	195
<i>H.J. Lamb, L.T. Nguyen, B.N. Engle, B.J. Hayes and E.M. Ross</i>	
Evaluating the benefits of including predictive SNP markers in single step evaluation in sheep using cross-validation	200
<i>L. Li, P.M. Gurman, A.A. Swan, N. Moghaddar and J.H.J. van der Werf</i>	
Ranking Brahman bulls for female reproductive performance in northern Australian commercial environments using DNA pooling	204
<i>Y. Li, L. Porto-Neto, R. McCulloch, S. McWilliam, P. Alexandre, J. McDonald, A. Reverter and S. Lehnert</i>	
A deterministic algorithm for optimality of threshold in a GWAS experiment	208
<i>Z. Loh, J. H. J. van der Werf and S. Clark</i>	
Current challenges for imputation of SNP chips to whole-genome sequence in cattle and sheep	212
<i>I.M. MacLeod, S. Bolormaa, C.J. Vander Jagt, T.V. Nguyen, A.J. Chamberlain and H.D. Daetwyler</i>	
Macro- and micro-genetic environmental sensitivity for 400 day weight in Australian Angus	217
<i>M.D. Madsen, J.H.J. van der Werf, V. Börner and S. Clark</i>	
Effect of bovine reference genome choice in RNA-SEQ alignment and differential gene expression analysis in Brangus cattle	222
<i>E. Mantilla Valdivieso, E. Ross, A. Raza, B. Hayes, N. Jonsson², P. James and A. Tabor</i>	
Genetic parameters for feed efficiency and weight in Jersey cows using 3D cameras in commercial Danish farms	226
<i>C.I.V. Manzanilla-Pech, R.B. Stephansen and J. Lassen</i>	
Revealing phenotypic and genetic relationships underlying the thermotolerance - production complex in beef cattle	230
<i>R.G. Mateescu, F.M. Rezende, K.M. Sarlo Davila, S. Dikmen, A.N. Nunez Andrade, A. Hernandez and M.A. Elzo</i>	

A new tool to select Angus bulls to breed to dairy cows	234
<i>S.P. Miller, J.A. Archer, F. Hely, C. Quinton, K. Retallick, D. Moser and P. Amer</i>	
The effect of GDF9 on litter size in Australian sheep	238
<i>N. Moghaddar, K. L. Bunter, A. A. Swan L. Li, P. M. Gurman and J. H. J. van der Werf</i>	
Dairyfarmer perceptions and attitudes to female genomic testing	242
<i>L.C. Monks, B. A. Scott, S.L. Bullen, J. J. Andony and M.M. Axford</i>	
Genetic analysis of body condition and growth traits in beef females within and across ages and physiological states	247
<i>K.L. Moore, T.P. Grant and D.J. Johnston</i>	
Ewe reproduction status and its impact on greasy fleece weight breeding values	251
<i>S.I. Mortimer, A.A. Swan and K.L. Bunter</i>	
Variation between Merino sires in lamb carcass value	255
<i>S.I. Mortimer, J. L. Smith, B.C. Hine, S.M. Fowler, B.W.B. Holman, D.L. Hopkins, K.L. Egerton-Warburton and A.A. Swan</i>	
The importance of early environmental effects on Merino fleece trains across two shearings	259
<i>K.L. Egerton-Warburton, J.L. Smith, S.I. Mortimer, A.A. Swan and B.C. Hine</i>	
Using mid-infrared spectroscopy predictions of fertility to optimise semen allocation in dairy herds	263
<i>J.E. Newton, P.N. Ho and J.E. Pryce</i>	
Exploring imputation accuracy across the bovine X chromosome	267
<i>T.V. Nguyen, S. Bolormaa, C.M. Reich, A.J. Chamberlain, A. Medley, C. Schrooten, H. D. Daetwyler and I.M. MacLeod</i>	
Genetic improvement of goats owned by smallholder goat keeper women in Bihar, India, with the help of a database tool	272
<i>C. Nimbkar, P. Amer, A. Schurink, T. Sawhney and R. Azam</i>	
Identification of genetic variants linking dairy fertility and milk production traits	276
<i>E. Ooi, J.E. Pryce and M.E. Goddard</i>	
Investigation of methods for inclusion of fixed effects for ultrasound scan carcass traits in large scale sheep genetic evaluation	280
<i>U. Paneru, D.J. Brown, N. Moghaddar and J.H.J. van der Werf</i>	
Identifying the breeding preferences and attitudes of the Australian beef cattle producer	284
<i>J.E. Peart, A.I. Byrne, M.J. Reynolds and C.J. Duff</i>	
How are you feeling, girls? – Behavioural traits as emergent properties of the community	288
<i>G.E.L. Petersen, A.C.L. Walters, P.F. Fennessy and P.K. Dearden</i>	
Industry consultation as the basis of a breeding objective for the New Zealand beekeeping industry	292
<i>G.E.L. Petersen, I.A. Balogun, P.F. Fennessy and P.K. Dearden</i>	
An evaluation of the effect of the Booroola gene, FecB, on productivity in a Border Leicester x Merino prime lamb production system	296
<i>L.R. Piper, A.A. Swan, J.M. Elsen, L. Bodin, H.G. Brewer and B.M. Bindon</i>	
Multibreed genomic prediction for male fertility in tropical beef cattle	300
<i>L.R. Porto-Neto, J. Bertram, S. McWilliam, M.R.S. Fortes, P. Alexandre, M.R. McGowan, B.J. Hayes and A. Reverter</i>	
Narrowing the search space: putative causal variants are enriched in annotated functional regions from 6 bovine tissues	304
<i>C.P. Prowse-Wilkins, J. Wang, M.E. Goddard, R. Xiang, J.B. Garner and A.J. Chamberlain</i>	

Indexes supporting genomic tools for selecting commercial Angus heifer replacements and identifying steers for long-fed programmes in Australia	308
<i>C.D. Quinton, J.A. Archer, P.R. Amer, S. Harburg, G. Petersen, A. Byrne, C. Duff and P. Parnell</i>	
Defining longevity and estimating genetic parameters in Australian Merino ewes	312
<i>M.O.A. Rahman, D.J. Brown and S.F. Walkom</i>	
Circular and genomic permutations can limit the confounding effects of the reference population in the analyses of selection signatures	316
<i>I.A.S. Randhawa, M.S. Khatkar, P.C. Thomson and H.W. Raadsma</i>	
Genome-wide analyses of scur genetics in cattle	320
<i>I.A.S. Randhawa, M.R. McGowan and R.E. Lyons</i>	
Efficiency of optimized poll testing assay in Australian beef cattle	324
<i>I.A.S. Randhawa, K.M. Schutt, M.R. McGowan and R.E. Lyons</i>	
Effects of poll breeding on reproductive traits in beef cattle	328
<i>I.A.S. Randhawa, R.E. Lyons and M.R. McGowan</i>	
EBVs predict progeny performance differences	332
<i>M.J Reynolds, C.J Duff, P.F Parnell and A.I Byrne</i>	
Economic analysis of Merino ewe performance from diverse industry sires using GrassGro™	337
<i>J.S. Wallace, K.L. Egerton-Warburton, and A.A. Swan</i>	
Assessing the potential of parentage testing using portable long read sequencing technologies	341
<i>E.M. Ross, H.J. Lamb, B.N. Engle, L.T. Nguyen and B.J. Hayes</i>	
Estimation of optimum polygenic and genomic weights in single-step genetic evaluation of carcass traits in Australian Angus beef cattle	345
<i>A.M. Samaraweera, J.A. Torres-Vázquez, M.G. Jeyaruban, D.J. Johnston and V. Boerner</i>	
Supporting data-driven sustainable livestock industries in developing countries	349
<i>B. Santos, G. Jenkins, T. Byrne, M. Teviotdale, A. Haile, C. Nimbkar and P. Amer</i>	
Improving carcass value by incorporating primal weights into pig breeding objectives	353
<i>N.R. Sarker, B.J. Walmsley and S. Hermes</i>	
Integration of GWAS, Network and Pathway analysis reveals novel insights into thermotolerance in beef cattle	357
<i>K.M. Sarlo Davila, E.E. Rodriguez, A.N. Nunez Andrade, G. Zayas, D. Rodriguez and R.G. Mateescu</i>	
Does selecting for the A2 B-casein allele increase inbreeding?	361
<i>B.A. Scott, M. Haile-Mariam, I.M. MacLeod and J.E. Pryce</i>	
Genomic breeding values for residual feed intake in Australian maternal composite ewes	365
<i>B.J. Sepulveda, S.K. Muir, S. Bolormaa, M.I. Knight, R. Behrendt, I.M. MacLeod, J.E. Pryce and H.D. Daetwyler</i>	
Exploring machine learning approaches to predict the incidence of lameness in dairy cows	369
<i>S. Shahinfar, M. Khansefid, M. Haile-Mariam and J.E. Pryce</i>	
New model for genetic evaluation of fertility in New Zealand dairy cattle	373
<i>K. Stachowicz, P.R. Amer, B. Falconer and D.P. Garrick</i>	
Next generation feed saved Australian breeding values evaluated in Holstein dairy cattle	377
<i>S. Bolormaa, I.M. MacLeod, M. Khansefid, L. Marett, B. Wales, G.J. Nieuwhof, C.F. Baes, F.S. Schenkel, M.E. Goddard and J.E. Pryce</i>	

Deriving breeding values for net reproduction rate from component traits in sheep <i>A.A. Swan and K.L. Bunter</i>	382
The Anstee Hub for Inherited Diseases of Animals (AHIDA) – development of a new online platform for surveillance, reporting and control of inherited diseases in animals <i>I. Tammen, C. Wade, B. Waud, M. Gimeno, B.D. Velie, B. O'Rourke and F.W. Nicholas</i>	386
Curation of pig traits in the Online Mendelian Inheritance in Animals (OMIA) database <i>S.M. Shields, S. Hermesch, F.W. Nicholas and I. Tammen</i>	390
Comparing genomic with pedigree relationship matrices and preliminary genome-wide association in Santa Gertrudis bulls <i>W.L.A. Tan, L.R. Porto-Neto, G. C. Gouveia, A. Reverter and M.R.S. Fortes</i>	397
Determination of optimum weighting factors for single-step genetic evaluation via genetic variance partitioning <i>J.A. Torres-Vázquez, A.M. Samaraweera, M.G. Jeyaruban, D.J. Johnston, and V. Boerner</i>	402
Economic benefit of additional recording for welfare traits in maternal breeding objectives for pigs <i>L. Vargovic, K.L. Bunter and S. Hermesch</i>	406
Genetic parameters for urinalysis traits recorded on gestating sows <i>L. Vargovic, S. Hermesch and K.L. Bunter</i>	410
Proposed genetic improvement strategies for dairy cattle in Kenya <i>P.K. Wahinya, A.A. Swan and M.G. Jeyaruban</i>	414
Using matesel to aid sire allocation in Genomic reference populations – Southern Multi-breed an example <i>S.F. Walkom, K.A. Donoghue, P.F. Arthur, S.A. Clark and B.J. Walmsley</i>	419
Initiating the Southern Multi-Bred Resource population <i>B.J. Walmsley, K.A. Donoghue, D.J. Johnston, S.A. Clark, J.P. Siddell, S.F. Walkom, T. Granleese and P.F. Arthur</i>	423
Genomic analysis of genotype by environment interactions in post-weaning weight of Australian sheep <i>D.L. Waters, S.A. Clark, N.Moghaddar and J.H.J. van der Werf</i>	427
Genome-wide association analysis of birth and weaning weights in Australia Taurine beef cattle <i>W.M.S.P. Weerasinghe, B.J. Crook and N. Moghaddar</i>	431
Genetic parameters for structural traits in New Zealand beef cattle and their correlations with production traits <i>F. Weik, R.E. Hickson, S.T. Morris, D.J. Garrick and J.A. Archer</i>	435
Genetics of heifer age at puberty in Australian Angus cattle <i>M.L. Wolcott, R. Banks and G. Alder</i>	439
Methane emissions variation among New Zealand dairy farms and herds <i>X. Zhang, P.R. Amer, K. Stachowicz, C. Quinton and J. Crowley</i>	443
The application of a sub-index weighted percent emphasis method to Australian dairy selection indexes <i>X. Zhang and P.R. Amer</i>	447
Genetic diversity and trends of Australian Japanese Black cattle <i>Y.D. Zhang and R. Banks</i>	451
HandyCNV: An R package for Standardized Summary, Annotation, Comparison, and Visualization of CNV and CNVR <i>J. Zhou, L. Liu, T.J. Lopdell, D. Garrick and Y. Shi¹</i>	455

Breeders Papers	
Ewe lamb joining for selection <i>L. Arney</i>	459
Performance Corriedale group genomics <i>P. Blackwood, C. Blackwood, J.M. Pitchford, H. Gordon, S.C. Welsh and W.S. Pitchford</i>	463
Investigating the potential to utilise commercial carcass traits in genetic evaluation <i>S.J. Lee, M. Beattie, R.A. McEwin, R. Tearle and W.S. Pitchford</i>	467
Genetics for self-replacing Maternals: Paradoo Prime <i>T. Leeming</i>	471
MerinoLink/UNE DNA Stimulation Project: Doubling the rate of genetic gain – Where are we after 4 years? <i>S.J. Martin and T. Granleese</i>	476
Popplewell tropical beef composite breeding program update <i>G.I. Popplewell, M.L. Facy, R.G. Tearle, R.A. McEwin and W.S. Pitchford</i>	480
Ewes for the future: A commercial comparison of ewe breeds for reproduction, wool and lamb growth <i>K.P. Ransom, F.D. Brien and W.S. Pitchford</i>	481
Improve your social license – Breed sheep for disease resistance <i>S.F. Walkom and K.L. Bunter</i>	486
