Volume 63 Issues 10–11 2023

25th Conference of the Association for the Advancement of Animal Breeding and Genetics

Preliminary material iii–xix

Helen Newton Turner Medallist Oration 2021

Reflections on genetic improvement 925–930
J. H. J. van der Werf

Review

Defining breeding objectives for sustainability in cattle: challenges and opportunities 931–946
C. M. Richardson, J. J. Crowley and P. R. Amer

Research Papers

On the value of adding commercial data into the reference population of the Angus SteerSELECT genomic tool 947–956
Antonio Reverter, Laercio Porto-Neto, Brad C. Hine, Pamela A. Alexandre, Malshani Samaraweera, Andrew I. Byrne, Aaron B. Ingham and Christian J. Duff

A large proportion of genetic variation in cow and ewe body composition is independent of yearling composition 957–962
W. S. Pitchford

Temporal trends in estimated breeding values for daughter fertility in Holstein and Jersey cows in the Australian dairy industry 963–971
John Morton

Long-read Pore-C shows the 3D structure of the cattle genome 972–982
Loan T. Nguyen, Hyungtaek Jung, Jun Ma, Stacey Andersen and Elizabeth Ross

Genetic relationships among yearling fertility, body composition and weight traits in tropically adapted composite cattle 983–995
M. L. Facy, M. L. Hebart, H. Oakey, R. A. McEwin and W. S. Pitchford

The impact of QTL sharing and properties on multi-breed GWAS in cattle: a simulation study 996–1007
Irene van den Berg and Iona M. MacLeod

A copy number variant near *KITLG* is associated with the roan pattern in alpacas 1008–1016
Ishani Shah, Naomi Gray, David Groth, Samantha Brooks and Kylie Munyard

Reaction-norm analysis of neonatal lamb mortality suggests heritability varies with cold-stress: an example in the Elsenburg Merino selection lines 1017–1030
C. L. Nel, Y. Steyn, A. R. Gilmour, D. Waters, S. A. Clark, J. H. J. van der Werf, A. A. Swan, K. Dzama and S. W. P. Cloete

Improving accuracy and stability of genetic predictions for dairy cow survival 1031–1042
M. Khansefid, J. E. Pryce, S. Shahinfar, M. Axford, M. E. Goddard and M. Haile-Mariam

Is there sufficient genetic variation to breed Elsenburg Merino sheep with shorter tails? 1043–1051
M. Teubes, S. W. P. Cloete, K. Dzama and A. J. Scholtz

Identification of six genomic regions associated with pigment intensity in alpacas 1052–1062
Naomi Gray, Ishani Shah, David Groth and Kylie A. Munyard

Comparative metabolomics analysis shows key metabolites as potential biomarkers for selection of beef fat colour 1063–1067
Rugang Tian, Hamed Kharrati-Koopae, Hojjat Asadollahpour Nanaie, Xiao Wang, Meng Zhao, Hui Li, Yuan Li, Hao Zhang, Ali Esmailizadeh and Cynthia D. K. Bottema

Using Australian genomics to predict dairy cattle performance in New Zealand <i>Craig Mckimmie, Majid Khansefid and Hamed Amirpour-Najafabadi</i>	1068–1073
Skim-Nanopore sequencing for routine genomic evaluation and bacterial pathogen detection in cattle <i>H. J. Lamb, L. T. Nguyen, T. E. Briody, R. K. Ambrose, B. J. Hayes, T. J. Mahony and E. M. Ross</i>	1074–1085
Approximating prediction error variances and accuracies of estimated breeding values from a SNP-BLUP model for genotyped individuals <i>L. Li, P. M. Gurman, A. A. Swan and B. Tier</i>	1086–1094
Application of machine-learning algorithms to predict calving difficulty in Holstein dairy cattle <i>Mahdieh Avizheh, Mohammad Dadpasand, Elena Dehnavi and Hamideh Keshavarzi</i>	1095–1104
An investigation into potential genetic predictors of birth weight in tropically adapted beef cattle in northern Australia <i>K. L. Moore, D. J. Johnston and T. P. Grant</i>	1105–1112
Use of dry-matter intake recorded at multiple time periods during lactation increases the accuracy of genomic prediction for dry-matter intake and residual feed intake in dairy cattle <i>Sunduimijid Bolormaa, Mekonnen Haile-Mariam, Leah C. Marett, Filippo Miglior, Christine F. Baes, Flavio S. Schenkel, Erin E. Connor, Coralia I. V. Manzanilla-Pech, Eileen Wall, Mike P. Coffey, Michael E. Goddard, Iona M. MacLeod and Jennie E. Pryce</i>	1113–1125
The Sustainability Index: a new tool to breed for reduced greenhouse-gas emissions intensity in Australian dairy cattle <i>T. T. T. Nguyen, C. M. Richardson, M. Post, P. R. Amer, G. J. Nieuwhof, P. Thurn and M. Shaffer</i>	1126–1135
SNP associations and genetic-parameter estimation for nose and hoof pigmentation in Corriedale sheep <i>J. E. Aldersey, M. S. Khatkar, P. J. Blackwood, C. E. Blackwood, J. M. Pitchford, H. Gordon, S. C. Welsh and W. S. Pitchford</i>	1136–1147
The genetic and phenotypic associations between lamb survival outcomes and other traits recorded at lambing <i>K. L. Bunter, D. J. Brown, P. M. Gurman, L. Li and A. A. Swan</i>	1148–1159
